

Optimal performance & maximum lifespan

Norwegian Greentech Aftermarket Services

In a maritime industry defined by strict regulations, increasing complexity, and high operational pressure, reliable operation is essential for profitability. Norwegian Greentech delivers not only advanced treatment systems – we ensure they perform optimally throughout the entire lifecycle of the installation.

Our Aftermarket Services enhance operational reliability, reduce total cost of ownership, and provide assurance that your vessel remains compliant with applicable regulations at all times.

EXTENDED WARRANTY WITH NGT SERVICE

Our certified technicians know our systems down to the smallest detail. When you use Norwegian Greentech personnel for service and installation of new parts, we offer an extended warranty.

This provides you with

- ✓ Documented quality assurance
- ✓ Reduced risk of installation errors and operational disruptions
- ✓ Extended lifecycle protection
- ✓ Single point of responsibility

With our team in place, you get more than service — you get the assurance that your system performs as intended.

ORIGINAL PARTS – KEY TO SAFE AND EFFICIENT OPERATION

The use of original parts from Norwegian Greentech is an investment in stability and compliance. Our components are developed, tested, and certified to meet both technical specifications and international standards.

Advantages of original parts:

- ✓ Ensures efficient and predictable operation
- ✓ Maintains system performance and lifespan
- ✓ Ensures compliance with applicable regulations and class requirements
- ✓ Reduces the risk of downtime and unforeseen costs

When you choose original parts, you choose reliability and a solution optimized specifically for your system.

RAPID AVAILABILITY OF CRITICAL SPARE PARTS

Time is a critical factor in maritime operations. That is why we have established efficient logistics solutions and strategically located stock points to ensure rapid delivery of spare parts.

What this means for your operations

- ✓ Minimized downtime
- ✓ Predictable operations and simplified planning
- ✓ Rapid response to unforeseen events
- ✓ A supplier who understands the importance of availability

We ensure you receive the parts you need — when you need them.

A PARTNER THROUGHOUT THE SYSTEM'S LIFECYCLE

Aftermarket services are not just about maintenance — they are about securing continuous value throughout the lifetime of your investment. With original parts, certified service personnel, rapid access to spare parts, and targeted training, Norwegian Greentech offers a comprehensive aftermarket model that supports high operational reliability and lower total cost of ownership over time.

Norwegian Greentech is more than a supplier — we are a long-term partner throughout the entire lifecycle of your system.

ONBOARD PRACTICAL TRAINING

When our service personnel are on site, we provide hands-on training for the crew. This ensures a better understanding of the system's functionality, maintenance requirements, and how to secure optimal performance in daily operation.

The training includes:

- ✓ Review of the system's main components
- ✓ Best practices for operation and maintenance
- ✓ Troubleshooting and preventive measures
- ✓ Adaptation to the vessel's operational requirements

A competent crew ensures safer operations and reduced downtime.
